

## GREEN ENERGY, GREEN JOBS, GREEN PLANET!

### Invitation

In 2010, the NHA Hydrogen Conference & Expo returns to Long Beach, California and you are invited to participate. With the new Administration and Congress, the emphasis on alternative energy development for the United States has been dramatically ramped up. Alternative energy development is one of the three pillars of the Administration's budget, as presented to the Congress, and it has been named as essential to the long-term strategy for economic recovery. Current Administration plans call for a critical role in the growth of alternative energy for job creation and environmental protection.

The State of California is a worldwide leader in hydrogen and fuel cell activity as well as the increased use of renewable energy. It has the third largest capacity for hydrogen production of any state, it is the birthplace of the "Hydrogen Highway," and it has fuel cells in use, hydrogen pipelines, automakers, and more, all near the event site.

As an exhibitor at the 2010 NHA Hydrogen Conference & Expo, you will benefit from the most fertile environment for hydrogen technology development and commercialization in many years. Like the last time the NHA came to Long Beach, in 2010 we expect more than 1,500 key players in industry, government, the media, and the communities of more than 20 different nations to participate. The expo will be held May 3 – 5, 2010 and the conference will run from May 3 – 6, 2010.

### Show Profile

The NHA Hydrogen Conference & Expo is *the* largest hydrogen event in North America and a leading event serving the international community. It is the place where partnerships are formed, deals are made, and new hydrogen technologies are introduced. It is the best conference and expo in North America to announce and showcase the commercialization of your technology and products. If you are in the North American hydrogen and fuel cell market, the 2010 NHA Hydrogen Conference & Expo is a "must do" event!

### Benefits to Exhibitors

- Meet the top VIPs in hydrogen technology development from industry and government.
- Meet customers and new prospects.
- Find industry partners to help your company move to commercialization.
- See all the top media covering hydrogen and introduce your products to them.
- Network with major contacts who can help your business.
- Participate in North America's top hydrogen conference. (*Separate registration is required.*)
- Check in with your competitors.
- Set up distribution networks.
- Meet hydrogen professionals from all over the globe.
- Educate the market about your product.
- Demonstrate your hydrogen vehicle at the Ride & Drive.

## **Some of the Exhibit Product Categories at the 2010 NHA Hydrogen Conference & Expo**

Fuel cells for mobile, stationary, and portable applications  
Fuel cell manufacturing, testing, and quality control  
Hydrogen production from fossil fuels  
Hydrogen production from nuclear energy and renewables  
Hydrogen generators  
Hydrogen compression, liquefaction, transportation, and storage  
Hydrogen infrastructure and supply chain solutions  
Hydrogen fueling stations  
Hydrogen appliances  
Hydrogen safety, leak testing, training programs  
Hydrogen certification and permits  
Fuel cells  
Engines  
Portable power packs  
Tanks  
Sensors  
Renewable energy systems  
Valves, nozzles, compressors, and other components  
Fuel cell membranes  
Fuel cell and internal combustion vehicles  
Fueling dispensers  
Forklift and pallet truck manufacturers  
Designing and engineering services  
Attorneys  
Financial and investment companies  
Education and outreach programs  
Commercialization programs  
Back-up power providers  
Telecommunications system designers  
Consulting services  
Integrators
